DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method for predicting the responsiveness to beta-blocker medications comprising genotyping the β_1 adrenergic receptor of an individual at codon 49, wherein the presence of the Ser49 phenotype is indicative of a likely response to said beta-blocker medication, classified in class 702, subclass 19.
- II. Claims 7 and 8, drawn to a method of reducing delays in blood pressure control comprising genotyping and providing, on the basis of the observed phenotype, an appropriate anti-hypertensive agent, classified in class 514, subclass 620.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of functions since Group I is related to the prediction of responsiveness to beta-blocker medications comprising genotyping the β_1 adrenergic receptor of an individual and Group II is related to a method of reducing delays in blood pressure control in an individual.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and their recognized divergent subject matter and a search in above unrelated invention would be an undue burden on the

examiner, especially in the non-patent literature search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer Kim whose telephone number is 703-308-2232. The examiner can normally be reached on Monday through Friday 8:30am to 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreenivasan Padmanabhan can be reached on 703-305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556 for regular communications and 703-308-4556 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
